Florida

PROFILE INFO

Software Engineer with strong design and analytics skills in building custom code. Experienced small shop owner that successfully managed an e-commerce store. A passion for coding and problem solving, driving me to always continue to push my limits and continue to grow .

RECENT PROJECTS

myFlix - Angular

An application built with Angular that allows users to view information about movies from a server-side database.

Chat App

A serverless PWA with React that interacts with the Google Calendar API, developed using a TDD technique.

myFlix - REACT

An application developed using the MERN stack that provides information about movies to users.

WORK EXPERIENCE

2013 - 2022
Founder & Operator/Web Developer

Mox Show Room

Owned and Operated Managed a team of 7-10 employees at a time. Managed and operated the website from both the front and back end.
